DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-53, 59-108, drawn to a system and method for adaptively controlling sensitivity, on a pixel-by-pixel basis, of a digital imager, classified in class 348, subclass 229.1.
 - II. Claims 54-58, 109-113 drawn to a system and method for determining transition points between a plurality of discrete points, classified in class 348, subclass 364.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as controlling sensitivity for a digital imaging device. See MPEP § 806.05(d).
3. The applicant is informed that in the event that the claims 1-53, 59-108 are elected, the Applicant must further elect one of the following species:

Species I directed to an adaptive sensitivity control method by counting the number of low and high intensity pixels corresponding to figure 11.

Species II directed to an adaptive sensitivity control method by the ND filter method corresponding to figure 12.

Species III directed to an adaptive sensitivity control method by counting the number of saturated pixels corresponding to figure 15.

Art Unit: 2615

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims is generic.

4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
